## DETAILED ACTION

### *Allowable Subject Matter*

The following is an examiner's statement of reasons for allowance:

The claimed invention is a display apparatus comprising

- A light source;
- A light integrator;
- A positive lens unit;
- A liquid crystal display panel that are arranged in sequence and that are aligned along optical axis;
  - The light integrator processing light radiated by the light source and allowing evenly distributed light to pass through;
  - The positive lens unit being disposed between the light integrator and the liquid crystal display panel such that the light from the light integrator passes through said positive unit before reaching the liquid crystal display panel, the positive lens unit including at least first and second lens components, each of which is formed from at least one lens member, wherein the first lens component is movable relative to the light integrator along the optical axis, and the second lens component is movable relative to the first lens component along the optical axis for forming an image with a desired focusing, brightness and magnification factor on the liquid crystal display panel.

Reference Tanitsu (US 6,236,449) does not disclose the first and second lens components of the positive lens unit are movable and the projection system is projecting to a liquid crystal display panel.

Reference Levis et al. (US 5,902,033) do not disclose the first and second lens components of the positive lens unit are movable.

Therefore, the above references do not disclose the claimed invention of present application and claims 1-3 allowed.

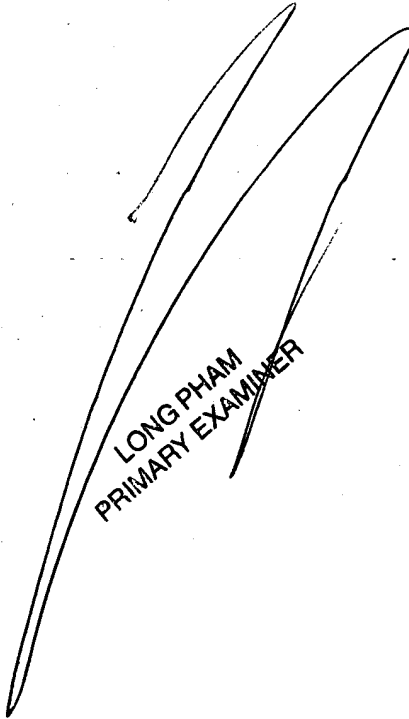

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
